

The 25 counties with the highest projected five year household growth

Only counties with at least 50,000 households in 2007 are included. All but one of the fifteen fastest growing counties are in the south or southwest. Of the twenty-five fastest growing counties, Lee and St. Lucie counties in Florida and Riverside County in California are core counties in their metros; all others are suburban communities.

Rank	County	MSA	Projected Five Year Household Growth
1	Pinal, AZ	Phoenix-Mesa-Scottsdale, AZ	35.2%
